## Introduction

The primary mission of the Consumer Product Safety Commission (CPSC) is to reduce injuries and fatalities associated with consumer products. For more than 25 years, the National Electronic Injury Surveillance System (NEISS) has been an essential tool in identifying the number and severity of consumer product-related injuries to persons treated in hospital emergency departments in the United States. This system has also served as a model for systems in other countries that track injuries.

Your hospital was statistically selected to participate in the NEISS to represent many similar hospitals in the United States. Practically speaking, that means that every injury you report will be important not only for itself, but because it will be multiplied by a weight to account for similar injuries treated at the other hospitals you are representing. Your reports lay the cornerstone in the effort to reduce injuries and deaths from consumer products. It is essential that each report be as complete and accurate as possible. Please follow these instructions carefully.

## General Instructions

The success of the NEISS depends upon accurate and timely data. Care must be taken to identify, correctly code and successfully enter into the computer, all appropriate cases. Most important is information about the patient, the incident, the injury and the product(s) associated with the injury. You will have to work closely with all persons who put such information on emergency department records. It is only with their help that you will be able to get accurate and complete data and eliminate guesswork or inadequate product identification.

### **Reviewing Hospital Records and Selecting Cases to Report**

Each day (or each time you work on NEISS), review the records for all emergency cases seen in your hospital since the last time you reported to determine whether an in-scope injury or illness is mentioned. Make sure that all cases that are part of the hospital's emergency system are reviewed for every treatment date. Be aware that some places of emergency care may be physically separate from the main emergency department in the hospital. For example, consider visits for emergency care to the adult and pediatric emergency department, the trauma center, the burn center, and occupational clinics. Include all fatalities for which an emergency department record was completed. Also include all emergency department cases where the patient was later admitted for hospitalization in the same facility or transferred to a different facility.

## General NEISS Reporting Rule

### Do Report

**All** consumer product-related emergency visits to your hospital, including emergency department cases, hospital admissions, trauma center and burn center cases, and cases transferred to other hospitals.

### **Definitions**

Product-related is defined to include all poisonings and chemical burns to children under 5 years and all cases where the injury scenario mentions a consumer product, sports or recreational activity listed as reportable in this Coding Manual or its addenda. In addition, code an illness **only** if a consumer product/activity is associated with the onset of the illness.

A consumer product is any article produced or distributed for use by a consumer in or around a home, school or recreational area.

NOTE: If a product cannot be found in the Coding Manual and you believe it is reportable, it can be reported with product code 9999, a temporary code pending assignment of an appropriate NEISS code. (An exception is the use of product code 5555 for poisonings or chemical burns to children under age 5)

Some specific examples of scenarios which **qualify for NEISS and should be reported** are listed below:

Poisonings (ingestions) and chemical burns to **children under age 5** associated with drugs, medications or any other substances.

NOTE: If you cannot locate an appropriate product code in the alphabetic listing, such as for hair or nail products, use code 5555.

Injuries which occur during sports or recreational activities. Injuries associated with bicycles even if a motor vehicle was involved.

Injuries associated with stairs, ramps, floors, walls, elevators, escalators, etc. wherever available for use by consumers.

Injuries which mention any kind of infant or nursery equipment.

Injuries associated with toys and games.

Burns, anoxia or other injuries which result from fires of fabrics, household goods, home heating and cooling equipment, etc.

Injuries normally not reportable may be reported under special studies, e.g., firearm-related injuries which are collected for the Centers for Disease Control. (See instructions for special studies.)

***It is not necessary to determine that a product was at fault to report an associated injury.*** Please report all cases which meet the criteria listed above. ***If in doubt, report it.*** Do not hesitate to call your CPSC headquarters representative for guidance (1-800-638-8095).

**Do not report visits for:**

Injuries associated with products listed as **Do not report** in the alphabetic listing of the NEISS Coding Manual.

Injuries associated with products not covered by CPSC:

- automobiles and motorcycles
- trains, boats or planes.
- firearms
- food
- illegal drugs
- medical devices

Injuries associated only with drugs, medicines, cosmetics, or pesticides ***EXCEPT do report poisonings or chemical burns to victims under age 5.***

Assaults and suicide attempts EXCEPT do report cases if victim and perpetrator are age 12 and under.

Occupational injuries.

Injuries previously treated in this or any other hospital.

Some specific examples of scenarios that do not involve consumer products and/or do not qualify for NEISS and should not be reported are listed below:

- Accidents where **no consumer product** is involved.

Examples: "Fell to ground."  
 "Fell on curb."  
 "Arm jerked by parent."  
 "Hit by rock."  
 "Fell on concrete sidewalk."

- Injuries or illnesses from live plants, trees, shrubs, etc.
- Injuries from **local government equipment or fixtures** such as fire hydrants, telephone poles, traffic signs, commercial mail boxes, sidewalks, streets, etc.
- Injuries from pieces of broken glass, pieces of metal, or **other parts of products where the product is unknown.**

## Coding and Data Entry

Each day (or periodically) review all the hospital records of emergency visits to the hospital and code each in-scope case. Be sure to include all reportable cases for treatment dates since the last time you coded cases.

Data entry will be easier if you group the emergency department records by the date of treatment.

Report only the **first** visit for a particular injury. If, however, the patient returns to the emergency department (even on the same day) with an injury or illness UNRELATED to the first one, code each of the visits separately.

## Specific Coding Instructions

Please read the following section very carefully. However thorough we try to be, we cannot foresee all possible problems in reporting cases for NEISS. If you have any questions, your Commission Representative will be very glad to help you. The CPSC toll-free number is: 1-800-638-8095. There is a section for each of the variables to be reported:

- Date of Treatment
- Case Number
- Date of Birth
- Age of Patient
- Gender of Patient
- Diagnosis
- Body Part Affected
- Disposition of Case
- Product(s) Mentioned
- Whether Intentionally Inflicted
- Incident Locale
- Fire Involvement
- Whether Work-Related
- Race and Ethnicity
- Other Race and/or Ethnicity
- Comments

## Medical Information Codes

Code the date on which the patient was seen for treatment.

### **Date of Treatment** (8 spaces)

Use two digits each for the month and day and four digits for the year, in that order. Whenever the month or day is 1 digit (1-9), add a zero in front of the number, i.e., 1 becomes 01, 2 becomes 02, etc.

Example:

<u>Date of Treatment</u>	<u>Code</u>
July 17, 2000	07/17/2000
November 3, 2001	11/03/2001
December 20, 2000	12/20/2000
March 12, 2005	03/12/2005

### **Case Number** (8 spaces)

Each case treated on a specific date must have a unique record number for NEISS.

You can use up to eight digits for your emergency department (ED) record or case numbers.

Example:

<u>ED Case Number</u>	<u>Code</u>
12345678	12345678

If your hospital uses more than eight digits for its case numbers, code only the LAST eight digits.

Example:

<u>ED Case Number</u>	<u>Code</u>
956781234	56781234

Do not code any letters of the alphabet, which may appear in your hospital's case number. Substitute zeros for any letters.

Example:

<u>ED Case Number</u>	<u>Code</u>
EA123456	00123456

**Date of Birth**

Whenever available, enter the date of birth for the patient. This will automatically calculate and insert the age of patient.

**Age of patient  
(3 spaces)**

When the date of birth is not available, the age of the patient must be entered. For children under two years old, record the age in months. To show that the age is in months instead of years, put a "2" in the first space of the age code. Code the age of infants in "completed months;" e.g., code the age of infants who are four to seven weeks old as one month. Code the age of infants who are less than one month old as one month.

Examples:

<u>Age</u>	<u>Code</u>
Three weeks	201
Four weeks (one month)	201
Seven weeks	201
Ten weeks	202
Nine months	209
Twelve months (one year)	212
Eighteen months	218

For a patient two years of age or older, record age in years.

Examples:

<u>Age</u>	<u>Code</u>
Two years	2
Eight years	8
Forty-five years	45
One hundred years	100
Not recorded	0

**Gender of Patient**  
(1 space)

Indicate the gender of the patient with one of the codes listed below:

<u>Gender</u>	<u>Code</u>
Male	1
Female	2
Not recorded	0

**Diagnosis**  
(2 spaces)

The diagnosis codes are listed in the table which follows. Use the **attending physician's diagnosis** to determine the nature of an injury. If the attending physician's diagnosis is missing, use diagnostic information provided by a medical professional to select the appropriate code. If the record contains no diagnosis by medical personnel, review the patient's complaint and the treatment given to arrive at the most logical diagnosis.

However, do not assume that the diagnostic words used at your hospital are always the appropriate words for a NEISS diagnosis. Carefully review the NEISS rules for coding the specific types of diagnoses that follow to learn how to interpret and report selected incidents. For example, the physician's diagnosis may be "ingested 15 iron supplement pills." For NEISS, the diagnosis is "poisoning." A word such as "anoxia" may be stated in the ED record when the victim has inhaled fumes from bleach. Again, the NEISS code for this is "poisoning" (inhaled vapors, fumes or gases) according to the definitions below. Use all appropriate medical information available together with your understanding of the NEISS diagnosis reporting rules to code the injury diagnosis for NEISS. Of course do not hesitate to call your NEISS representative whenever you have a question on coding.

When more than one diagnosis appears on the emergency department record, code the one that seems to be the most severe. Others should be noted in the Comments.

If diagnosis code 71 (Other/Not Stated) is entered, the cursor will tab to a "Diagnosis Other" field. You will be required to enter a text string into this field that will describe the diagnosis.

Since we are especially concerned with injuries to children, if there was a *poisoning or chemical burn* to a child under 5 years from a product which is not listed in the Coding Manual, or if the product code is underlined, report the case using product code 5555.

Appendix B contains additional diagnosis cross references

## Definitions of Selected Diagnoses

- **ANOXIA:** Use code 65, Anoxia, when the patient cannot obtain sufficient oxygen, either due to hampered breathing or lack of oxygen itself. Code anoxia when:
  1. The diagnosis is strangulation, suffocation or asphyxia.
  2. The patient has inhaled products of combustion, such as carbon monoxide (CO), smoke, soot, etc. (e.g. from a house fire, heating appliance or camping equipment).
- **ASPIRATED FOREIGN OBJECT:** Use code 42, Aspirated foreign object, when an object causes choking or is caught in the nose, lungs or the airways in between the nose and the lungs.\* The object should generally be one that **does not lead to poisoning or anoxia** (inability to obtain oxygen). Examples of such objects are thumbtacks, beads, miniature light bulbs, and even pills. If the victim chokes while being fed liquids and the hospital record describes the event as an aspiration, then the aspiration code may be used.
 

(\*We do not consider the esophagus to be part of the airway.)
- **BURN INJURIES:** Try to get information about the kind of burn (chemical, electrical, scald, thermal, radiation). If the attending physician's diagnosis is inadequate, one can sometimes deduce the type of burn from the kind of incident and product(s) involved.

<u>Scenario</u>	<u>Code</u>
Patient burned when hot water spilled onto his arm.	48, Scald burn
Contact with acids, alkalies or caustics.	49, Chemical burn
Chemical ignited causing injury from resulting flames.	51, Thermal burn
Burns from flammable liquids (gasoline, kerosene or lighter fluid) which ignited.	51, Thermal burn

*Note: For thermal burns, indicate in the Comments if the burn came from flames or a hot surface.*

- |  |                           |
|--|---------------------------|
| Burns from arcing, electrical products.  | 46, Electric burn         |
| Burn/cell damage by radiation, ultraviolet microwaves, laser beams or radioactive materials. | 73, Radiation burn        |
| Burn caused by exposure to sun lamp  | 73, Radiation burn        |
| Burn caused by touching the hot surface of lamp  | 51, Thermal burn          |
| Pulmonary burns  | 62, Internal organ injury |
- **CHOKING:** If the **ONLY** diagnosis is "choking" and the Object that caused it is insoluble (e.g., a toy) or semi-soluble (e.g., putty), code 42, Aspirated foreign object.
  - **INGESTED FOREIGN OBJECT:** Use code 41, Ingested foreign object, only when BOTH of the following conditions are met:
    1. The patient has swallowed an insoluble, solid object; that is, an item that will not dissolve in liquid, and
    2. The swallowed object is not likely to cause poisoning.

Some commonly swallowed objects are coins, toy parts, buttons, nails, crayons. The foreign object may or may not have lodged somewhere inside the body.

The esophagus is not considered part of the airway; therefore, anything lodged in the esophagus should be coded as an ingestion.

- **POISONING:** Code 68, Poisoning, should be used when a patient:
  1. Swallowed either a liquid or soluble chemical or drug/medication. (Chemicals that may cause poisoning include liquids such as furniture polish, bleach, lighter fluid, paint, gasoline and alcohol. Poisoning can also be caused by such non-liquid household substances as charcoal, powder detergents, toilet bowl cleaning tablets, spackling compounds and solid room deodorizers. These substances dissolve in liquid.)
  2. Inhaled vapors, fumes or gases (e.g. from chemicals, cleaners or fuels). (Exception: vapors from carbon monoxide (CO) and smoke from fires are coded as Anoxia.)
  3. Swallowed either a liquid or soluble chemical or drug and had an “allergic reaction” (including swelling, skin rashes, etc.)
- **OTHER/NOT STATED:** If none of the listed diagnoses in Appendix B is appropriate, use code 71, Other/Not Stated. Whenever you use diagnosis code 71, please record the actual diagnosis in the DIAGNOSIS OTHER text field.

**Body Part Affected**  
(2 spaces)

Use the codes in the table which follows for the body part affected in the product related incident. Also see Appendix C. The body part diagram in Appendix D will help you visualize more clearly the boundaries of such parts as lower trunk, upper arm, etc.

In general, if an injury affects more than one body part, code the body part that seems to be most seriously hurt. Then, mention other body parts in the Comments.

Special rules for back injuries, burn injuries, extremity injuries, eye injuries, head injuries and injuries which affect the entire body are discussed in the section which follows the body part table.

<b><u>Body Part Affected</u></b>	<b><u>Code</u></b>
Arm, lower ( <u>not</u> including elbow or wrist)	33
Arm, upper	80
Ankle	37
Ear	94
Elbow	32
Eyeball	77
Face (including eyelid, eye area and nose)	76
Finger	92
Foot	83
Hand	82
Head	75
Internal (use with aspiration and ingestion)	00
Knee	35
Leg, lower ( <u>not</u> including knee or ankle)	36
Leg, upper	81
Mouth (including lips, tongue and teeth)	88
Neck	89
Pubic region	38
Shoulder (including clavicle, collarbone)	30
Toe	93
Trunk, lower	79
Trunk, upper ( <u>not</u> including shoulders)	31
Wrist	34
25-50% of body	84
All parts of body (more than 50% of body)	85
Not recorded	87

## Discussion of Body Part Affected for Selected Injuries

- **BACK INJURIES:** For a diagnosed back injury, if possible determine whether the upper back (upper trunk/thoracic vertebrae), code 31, or lower back (lower trunk/lumbar vertebrae), code 79, was involved and code accordingly. Use the waist or navel as the dividing line to differentiate between upper and lower trunk. If the diagnosis simply says "Back injury," use code 31, Upper trunk. (Note: For cervical vertebrae, use Neck, code 89.)
  
- **BURN INJURIES:**
  1. If only one body part was injured, code that body part. If more than one body part was injured, generally code the body part with the most severe injury.
  2. For burns involving up to 25% of the body, code the most severely burned body part.
  3. For burns covering 25% to 50% of the body, use code 84.
  4. For burns covering more than 50% of the body surface, use code 85.
  
- **EXTREMITY INJURIES:** For a diagnosed arm or leg injury, if possible determine whether the upper arm (code 80) or lower arm (code 33), or upper leg (code 81) or lower leg (code 36), was involved and code accordingly. If the diagnosis simply says "Arm injury" or "Leg injury," use code 33, lower arm, or code 36, lower leg.
  
- **EYE INJURIES:**
  1. For injuries to eyelids, eyebrows, or the area immediately around the eyes, use code 76, Face.
  2. For an injury to the eye itself, use code 77, Eyeball.
  
- **HEAD INJURIES:** When coding head injuries, code the most specific diagnosis given. When there is no specific diagnosis for a head injury, it should be coded as an internal organ injury (62). Coding the most specific diagnosis should not take precedence over coding the most severe injury. For example, "internal" head injuries such as subdural hematoma, hemorrhaging, etc., should also be coded as internal organ injury (62). If the diagnosis only states "hematoma to the head", then the diagnosis should be coded as hematoma (58). When there are two injuries even to the head, code the most severe.

- **INJURY DIAGNOSES AFFECTING THE ENTIRE BODY:**

As shown below, four diagnoses must ALWAYS be accompanied by body part code 85, All parts of body, in the body part spaces. In addition, two other diagnoses MUST be accompanied by body part code 00, Internal. These diagnoses are:

<u>Diagnosis</u>	<u>Diagnosis Code</u>	<u>Body Part Code</u>
Anoxia	65	85
Electric shock	67	85
Poisoning	68	85
Submersion (incl. drowning)	69	85
Aspirated foreign object	42	00
Ingested foreign object	41	00

**Disposition of Case**  
(1 space)

Use the codes given below to indicate the disposition of the case from the emergency department.

<u>Disposition</u>	<u>Code</u>
Treated and released, or examined and released without treatment	1
Treated and transferred to another hospital	2
Treated and admitted for hospitalization (within same facility)	4
Held for observation	5
Left without being seen/Left against medical advice	6
Fatality, including DOA, died in the ED	8
Not recorded	9

*NOTE: Also use code 1 when the patient is not hospitalized, but transferred for treatment to another department of the same facility.*

## Consumer Products

### Products Involved (4 spaces for each of 2 product codes)

Please work closely with hospital emergency department staff to see that emergency department records mention all products involved in reported injuries.

The PC-NEISS program provides two 4-digit spaces for coding up to two products involved in an injury. Consult the alphabetic product code listing and select the most appropriate product code(s). We believe that all consumer products can be classified using the codes in the alphabetical index. However, if you need assistance in deciding on the correct coding of a case, use 9999 or call your NEISS representative for assistance. Your NEISS representative will call or send a message back to you providing guidance on how to code the case.

When only one product is associated with an injury, place the product code for that product in the space allocated for "First Product Code" and fill in the "Second Product Code" spaces with 4 zeros (0000).

When two products are associated with an injury, either product may be coded as the first product and the other as the second product.

*Example:* An 11-year old boy riding a bicycle ran into a swing.

Code: Product 1 = 5040 (bicycle) and Product 2 = 3246 (swings) **or**  
Code: Product 1 = 3246 (swings) and Product 2 = 5040 (bicycle)

Exception: When two products involved in an incident are the same product, do not code a second product; simply fill in the "Second Product Code" spaces with zeros. For example, if two skateboard riders collide, code skateboard, 1333, for the first product and 0000 for the second product.

### Product Information Needed

Whenever possible, report specific products rather than general types of products; for example: electric oven, electric scissors.

As another example, try to learn whether an injury from a saw involved a chain saw, a portable circular saw, a radial arm saw, a hand saw, a saber saw, etc.

***To get such detailed information, coders should continually encourage hospital admissions clerks, nurses and physicians to record specific product detail. If you cannot get this kind of detail, at least try to emphasize the need to know whether the product was powered or motorized (gas, electric) or unpowered or manual (e.g. power saw vs. hand saw).***

If a product is not specified as "electric," "powered," or "motorized," do not assume it is. Use the "Not otherwise specified" code or if there is none, then you may use the code for the manual product.

**Assignment of Product Code**

The product code section of this manual provides an alphabetical listing of products and their corresponding NEISS product code numbers. When product code names include more than one product, there is an alphabetic listing for each product.

Example:

**Bedspreads, throws or comforters** **0667**

is also listed as

**Comforters**

Use: Bedspreads, throws or comforters **0667**

and

**Throws**

Use: Bedspreads, throws or comforters **0667**

In addition, the alphabetic list also includes products that are similar to the coded products but whose names are not part of the title.

Example:**Afghans**

Use: Bedspreads, throws or comforters **0667**

**Handbags**

Use: Clothing accessories **1647**

**Specific Product Codes**

Consult the alphabetic NEISS Product Codes section of the Coding Manual for the specific product code. When words such as electric, gas, portable are used in the ED record, first look up the product itself. For example, look up "Saws" rather than "Power saws," and look up "Blankets" rather than "Electric blankets."

When more than one code exists for a particular type of product you are directed to choose among the various eligible codes, as shown below for pillows:

Example:**Pillows**

Choose among:

Pillows (excl. water pillows) **4050**

Waterbeds or water pillows **0662**

**“Other” Products in a Category** The code for Other named products, as in "Other baby carriers," for example, is used only when the ED record identifies a specific product, but there is no code given for that particular product.

Example:

Portable infant seat	1549, Other baby carriers
Armoire	4013, Other furniture

When you select a product code with the "Other" in the title, please describe the particular product in the Comments.

**“Not Specified” Product in a Category**

If there is no description of the product to help you choose a specific code or an "Other" code, you may have to use a "Not specified" code. Not all product groups have a "Not specified" code. In those cases, choose the best code from among those listed.

Example:

**Soldering Irons**

*Choose among:*

Electronic soldering equipment	<b>0866</b>
Non-electric soldering equipment	<b>0868</b>

*If type of soldering equipment is not specifically identified,  
Use: Soldering equipment, not specified* **0859**

**Product Categories Listed as “Also consider”**

"Also consider," a direction that accompanies many codes, suggests other products or groups of products that are related to the one already under consideration. Consider which most appropriately describes the product.

Example:

**Bottle Openers** **0422**

*Also consider:*  
Can Openers

**Adult Games**

*Choose among:*

Video or electronic games Use: Computers (equipment and electronic games)	<b>0557</b>
Toys, not elsewhere classified	<b>5004</b>

*Also consider:*  
Sports

**Products Excluded from a Code**

Products excluded from a particular code are listed in parentheses immediately following the code title. These products appear elsewhere in the alphabetic list with their own separate code numbers.

Example:**Manual cleaning equipment (excl. buckets or pails) 0480**

The entry for manual cleaning equipment indicates that there is a separate entry for buckets or pails. This entry is shown below as it appears in the alphabetical list.

**Buckets or Pails 1143****Products Included in a Code**

Unless a product code title has qualifying words or phrases, it includes all varieties of that product with the exception of toys. For example, "Televisions" includes all sizes, black and white, color, free-standing and cabinet models.

**Product Parts**

For injuries involving only a particular part or *component* of a product, code the product as a whole. If the *source product* is not stated (e.g., pieces of glass, metal, wood, plastic, etc.), do not code the product.

ScenarioProduct Code

Injured from tripping over a television cord

0572, Televisions

Injured on steps of a slide

1242, Slides or sliding boards (excl. swimming pool and water slides)

Injured on piece of broken glass

Do not code

Injured on piece of broken glass from a storm window

1826, Storm windows

**Toys**

A product is considered a toy *only* if it is specifically described as a toy (e.g., play money, toy watch, toy car, etc.), or if you can clearly assume from the information recorded that the product is a toy.

<u>Scenario</u>	<u>Product Code</u>
Child lacerated his leg while digging in the yard at home with a shovel	1403, Other unpowered tools
Child fell and cut lip while playing in the yard at nursery school with a toy shovel (record explicitly states "toy")	5004, Toys, not elsewhere classified
2-year old child lacerated hand on miniature plastic shovel obtained in cereal box; occurred in sandbox at neighbor's home (assume toy shovel from information given in ED record)	5004, Toys, not elsewhere classified

**Sports and Games**

The phrase "activity, apparel or equipment" accompanying sports codes means that any apparel or equipment contributing to an injury during a game or sport is coded as part of the product code for that sport. In addition, please specify in the Comments the item of apparel or equipment, e.g., football helmet, tennis racquet, ski binding, etc.

However, if apparel or equipment is not mentioned, but the activity or sport is specified, report the case, using the product code for the sport.

<u>Scenario</u>	<u>Product Code</u>
Scalp lacerated by thrown tennis racquet at school	3284, Tennis (activity, apparel, or equipment)
Sprained ankle playing tennis at the recreation center	3284, Tennis (activity, apparel, or equipment)

**Poisoning or  
Chemical Burns to  
Children Less than  
5 Years of Age**

When coding poisoning cases and chemical burns for children under 5 years of age, if the product is not a consumer product, or if the product is unknown, and you cannot locate an appropriate product code in the alphabetic listing, report the case using product code **5555**.

**“New” Product  
Codes for Consumer  
Products Not Found  
in Manual**

If you believe a case involves a consumer product, but you cannot determine an appropriate product code, or you have a coding question about any case and are not able to discuss the case with your NEISS representative, you may use code **9999** *temporarily*. NEISS Headquarters staff will review these cases and determine whether 1) a current NEISS product code can be used, or 2) a new product code should be added to the Manual. In either case, your NEISS representative will contact you after reviewing the case.

## Product Coding for Special Types of Incidents

Listed below are some situations which require special coding treatment.

### Flammable Fabrics

If a burn or smoke inhalation injury results directly from a flammable fabric, code (up to) two products involved by coding:

- The source of the fire (such as stove, portable room heater, camping lantern, or other fire-causing item), and
- The first item to ignite (such as blanket, clothing, draperies, slipcover, etc.)

Remember, for NEISS it does not matter which item is coded the first product or the second product.

In the field labeled "Fire", enter code 1, 2 or 3 to indicate that the incident involved smoke inhalation, unexpected flames or smoke, or unexpected spread of flames or smoke and whether the fire department attended. (See the section on Fire Involvement.)

### House Fires

In the case of a house fire and/or smoke inhalation where no specific product is identified, use product code **1866** (General home or room involvement in fires) as the first product code. Use this code, for example, when the emergency department record describes the incident as "house fire" or "fire in the basement" and no other information is available. If there is a house fire and a specific consumer product is identified, code the specific consumer product only. If the fire involved a firearm (1935, 3224, or 3253), code both 1866 and the firearm.

*Again, use code 1866 for First Product only when the record does not mention a product.*

Enter code **1, 2 or 3** in the "Fire" column to indicate that the incident involved smoke inhalation, unexpected flames or smoke, or unexpected spread of flames or smoke and whether the fire department attended. If known, state the particular room involved (e.g. bathroom, living room) in the COMMENTS whenever product code 1866 is used.

**Product Fires**

A product fire can be extensive (fire/flames) or limited (with smoldering/smoke). Code the specific product(s) involved.

Enter code **1, 2 or 3** under the “Fire” column to indicate that the incident involved smoke inhalation, unexpected flames or smoke, or unexpected spread of flames or smoke and whether the fire department attended.

**Hot Water**

When an injury involves hot water, code the source of the water (e.g., teakettle, sink, bathtub, etc.) as one product and use 1934, Hot water, as the other product code.

ScenarioProduct Code

Child scalded by hot water spilled from a teapot

0453, Coffee maker or teapots, not specified *and* 1934, Hot water

Child scalded by hot water in the shower

0611, Bathtubs or showers *and* 1934, Hot water

*Note: If there is no specific product information for a hot water injury, code 1934, Hot water, as the "First Product" and fill in the "Second Product" code spaces with zeros.*

**Carbon Monoxide**

When an injury involves carbon monoxide poisoning, and the source is unknown, use product code 1899. A second product code may be used as long as it is not the source of the carbon monoxide (i.e., carbon monoxide detector).

**Gas Fumes or Vapors of Unknown Origin**

When an injury involves gas fumes or vapors, and the source is unknown, use product code 1898. A second product code may be used as long as it is not the source of the gas fumes or vapors .

## Other Codeable Information

### Whether Injury was Intentionally Inflicted (1 space)

An intentional injury or poisoning is one that is inflicted with the aim of injuring or killing. The injury may be either one that was inflicted by one person on another, or one that was self-inflicted. Use one of the following categories below to indicate a) whether the injury resulted from a confirmed or suspected intentional act (e.g. assaults or self-inflicted injuries where the victim is age 12 and under, or where a firearm is involved for any age - *Codes 1 & 2*), b) an injury related to law enforcement activities associated with firearms (*Code 3*), or c) an unintentional act, including acts of unknown/undetermined intent (*Code 0*). **Always use code 0 unless the case involves an intentional injury to those age 12 and under, or a firearm is involved.**

<u>Injury Intent</u>	<u>Code</u>
Assault / intentional injury (confirmed or suspected)	1
Self-inflicted injury including suicide or suicide attempt (confirmed or suspected)	2
Injury related to legal intervention associated with firearms (due to law enforcement activity)	3
Unintentional (accidental) injury or injury intent not determined / not recorded	0

Definitions of these categories and some examples follow:

***Assault/intentional injury – Code 1:*** Includes all confirmed or suspected cases of injuries and poisonings inflicted by one person on another person only if the victim and perpetrator are age 12 and under, and the incident is product-related. Also includes any firearm incidents, regardless of age. This would include intended and unintended victims of violent acts.

**Includes:**

- 9 year old stabbed w/ knife while fighting w/other 9 yr old
- 8 month old male burned when brother set fire to his crib

**Excludes:**

- accidental shooting victim (**code as 0**)
- accidental drug overdose victim (**code as 0**)
- child shot playing with BB gun (**code as 0**)

***Self inflicted injury – Code 2:*** Includes suicides and suicide attempts, both confirmed and suspected, where the medical record indicates that the person was age 12 and under, and were trying to take their life, and a codeable consumer product is involved. Also includes any self-inflicted gunshot wounds, regardless of age.

**Includes:**

- 24 year old female with self-inflicted gunshot wound to the head
- slashing of wrists by 12 year old with knife in suspected suicide incident
- self-mutilation involving consumer product (age 12 & under)

**Excludes:**

- teenager hitting wall with fist when upset with mom (**code as 0**)

***Legal Intervention – Code 3:*** Includes injuries caused by police or other legal authorities during law enforcement activities where a firearm is involved.

**Includes:**

- burglar shot by police

**Excludes:**

- police injured spouse or partner with gun during domestic dispute (**code as 1**)
- police injured someone with handgun, but not during the line of duty (**code as 1**)

***Unintentional (accidental) or unknown intent – Code 0:*** Includes all injuries and poisonings not inflicted by deliberate means including incidents described as "accidents" regardless of who inflicted the injury. Also includes cases where the emergency department record contains no indication of intent.

**Includes:**

- 8 year old accidentally shot self with handgun (**code as 0**)
- painter fell off of ladder and fractured foot (**code as 0**)

**Fire Involvement**  
(1 space)

If there was not a fire, or the fire did not involve unexpected flames/smoke or unexpected spread of flames/smoke, use code 0.

Use Codes 1, 2 or 3 (fire involvement) when the incident involved smoke inhalation, **unexpected** flames or smoke, or **unexpected** spread of flames or smoke.

For a fire that was **attended** by the Fire Department, use code 1. For a fire, that was **not attended** by the Fire Department, use code 2. For a fire where Fire Department attendance is **not recorded**, use code 3.

<u>Fire Involvement</u>	<u>Code</u>
Fire involvement and/or smoke inhalation - Fire Dept. attended	1
Fire involvement and/or smoke inhalation - Fire Dept. did not attend	2
Fire involvement and/or smoke inhalation - Fire Dept. attendance is not recorded	3
No fire or no flame/smoke spread	0

**Occupational (Work-Related) Incident Involving Firearms**  
(1 space)

Use this variable to indicate that an *injury* occurred while the victim was involved in a work-related activity. **Only firearm related cases will be accepted as work-related (codes 1 & 3)**

<u>Work-Related</u>	<u>Code</u>
Not recorded	0
Work-related; occurred on the job (excluding active military duty)	1
Not work-related; did not occur on the job	2
Work-related; active military duty	3

**An incident is work-related if:**

- it involves a firearm
- AND**
- it occurred "at work," "on-the-job" or was "occupational," or
  - the ED record implies the incident was work-related, e.g., "hit on head with gun while attempting to apprehend a suspect," or "shot in hand while delivering a pizza," or
  - it happened during volunteer work for an organized group, such as a volunteer fire fighter, volunteer in a hospital (e.g., candy striper) or volunteer for a charity group, such as a volunteer cook at a homeless shelter, or
  - it occurred during farm- or other family-business related work duties, even when the victim is a child, such as "finger stuck in barrel of BB gun while trying to scare owls from the barn," "shot by unknown assailant while clearing tables at parent's restaurant."
  - it is covered under workman's compensation.

**Race**  
(1 space)

Report the patient's race as it is recorded in the emergency department record. Use "other" for the race if it is other than "white" or "black." If the "other" race code is selected, also specify the patient's race or ethnicity on the free-text line for race/other.

<b><u>Race</u></b>	<b><u>Code</u></b>
White	1
Black	2
Other	3
Not stated in ED record	0

**"Other" Race or Ethnicity**  
(15 spaces)

If "other" is used, please specify the **other race** or the patient ethnicity in the free text area that follows the codes. Examples of "other race" entries that may be seen in the emergency department record are:

- American Indian or Alaskan Native
- Asian or Pacific Islander
- Hispanic

Even if race is entered as "white" or "black," the entry cursor will pause on the free-text line to allow you to enter the patient's **ethnicity** (e.g. "Hispanic").

**Comments**  
(2 lines of 71 spaces each)

Every case **MUST** include descriptive comments or remarks. Enter these notes on the two lines labeled "Comment" that immediately follow the coded entries.

**Incident Sequence**

The comments should include a description of what the victim was doing when the injury occurred (sequence of events), the product involved and the locale of the incident. Quote verbatim the words actually used on the emergency department record. Refer to the ED notes of the physician, nurse and clerk for pertinent information. When "Other" is used for the diagnosis, include an explanation (i.e., actual diagnosis) in the Comments.

Example:

Cleaning ear with cotton swab when cotton lodged in ear, at home.

Rubber sandals broke, victim tripped on carpet at school.

Someone stepped on his hand while tackling ball carrier in football game at high school.

**Brand Name**

Please include the brand name or manufacturer of the product associated with an injury whenever such information is available. Remarks like "doll made in Taiwan" or "English bicycle" are helpful in the absence of any other product identification.

**Product Description**

Whenever you code a product as "Other" (e.g., Other baby carriers; Furniture, other; Other drugs or medications, etc.), describe the specific product in the Comments.

Scenario

Product Code

Patient was hit in the eye by a dart fired from a toy cannon

5001, Other toy weapons (projectile)

*In Comments:* Dart from a toy cannon

A patient cut himself with a steak knife

0464, Knives, not elsewhere classified

*In Comments:* Cut with steak knife

Similarly, for products such as tableware, manual cleaning equipment, etc., specify the particular item (e.g., sugar bowl, broom) in the Comments. Product codes for sports also require identification of the game involved as well as any equipment or apparel associated with the injury. In addition, whenever the product code is 1866 (General home or room involvement in fires), the Comments should include the room involved (such as bedroom or kitchen), if known.

**PRODUCT IDENTIFICATION CAN NEVER BE TOO SPECIFIC!**

If you are uncertain whether a given product code requires elaboration, add further detail to the Comments.

## **Patient Confidentiality**

The Consumer Product Safety Commission conducts telephone and/or on-site interviews to obtain detailed information for selected cases. For the cases selected, the NEISS hospital coder is requested to supply the patient's name, address and telephone number.

Note that patient confidentiality is protected at all times. After an investigation has been completed, information identifying the patient is removed from CPSC's records.
